KEY INGREDIENTS

KERADYN HH

Breathes new life and movement into hair damaged by chemical treatments, heat, styling and UV light. Keradyn HH enhances fibre alignment and reduces friction between hair strands for the freedom of movement.

AC VOLUMISING COMPLEX: uses a three-pronged approach to maximize volume and hold curls. The plant-derived amino acids, polymer and date fruit are combined to provide a complex to strengthen chemically-treated hair, resulting in bouncy curls and increased volume..

KERAMIMIC 2.0

Combines the best of science and nature for intelligent repair of damaged hair. Developed using advances in proteomics, Keramimic 2.0 contains the amino acid sequences of peptides that match keratin proteins found in cuticular and cortical regions of human hair. The highly functioning conditioning active provides targeted repair.
